Pat Biondo
Biondo Boats
N5514 County Rd Z
Onalaska, WI 54650

Dear Pat,

In 1996, we were tapped by Husky Airboats to give their boat an improved hull shape. We blended our planing hull expertise with the unique requirements of operations in water hard and soft. We spent time on the boats in actual winter conditions and in the open ocean to better understand the issues and challenges, and then designed the new hull you build today. In addition, we consulted on structure and laminates and supervised the construction of the tooling and molds.

Ray Hunt Design has over 50 years' experience in the design of high-performance planing hulls. Ray Hunt was the inventor of the Deep-V hull. Hundreds of Hunt designs are in military and commercial service around the world including the US Navy, Coast Guard, and NYPD. Ray Hunt Design offers a full range of design, naval architecture and engineering services to the marine industry.

We look forward to assisting Biondo Boats in future.

Regards,
